About

Front-End Engineer with 6+ years of experience building scalable web applications using React, Vue, Shopify, and WordPress. Strong background in REST API integration, CI/CD pipelines, and Azure cloud environments. Bridging front-end development, QA, and DevOps to deliver reliable and scalable web applications.

Key Projects & Achievements

- Contributed to front-end development for high-visibility platforms including sheahomes.com, epicuren.com, and sdccu.com
- Built scalable interfaces using React, Vue, JavaScript, and Shopify across 30+ client platforms
- Integrated REST APIs to deliver dynamic, data-driven user experiences
- Streamlined deployments through CI/CD pipelines and Azure-based infrastructure

Work Experience

Red Door Interactive, San Diego (remote) Oct 2018 - March 2026 Front-End Engineer / DevOps & CMS

- Developed and maintained front-end solutions using JavaScript, React, Vue, SCSS, and Shopify Liquid across 20+ client platforms
- Integrated REST APIs to build dynamic, data-driven user interfaces
- Designed and maintained CI/CD pipelines using GitHub and GitLab
- Managed deployments and environments in Azure (DNS, SSL, hosting)
- Implemented automated testing workflows and ensured cross-browser and accessibility compliance (WCAG 2.1)
- Collaborated with cross-functional teams to deliver production-ready features
